Project Design Phase-II
Data Flow Diagram & User Stories

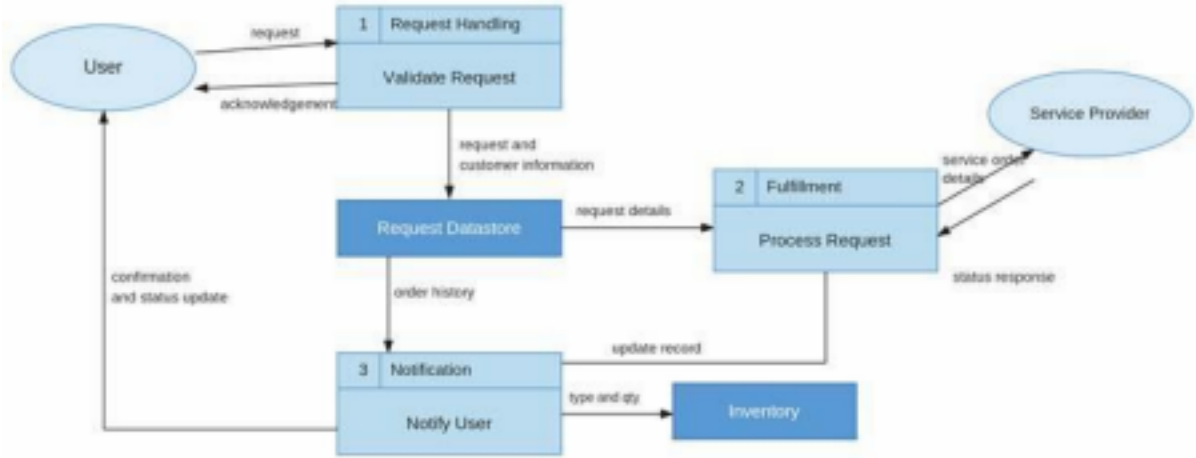

Date	28 October 2026
Team ID	SKILLWALLET-EV-01
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
EV Consumer / Buyer	Market Exploration	USN-1	As a prospective EV buyer, I want to filter vehicles by Category and Price range so that I can find vehicles matching my budget.	Dashboard dynamically filters and displays matching vehicles within 1.5 seconds.	High	Sprint-1
EV Consumer / Buyer	Technical Comparison	USN-2	As an EV driver, I want to compare battery capacity vs. driving range so that I can eliminate range anxiety.	Scatter plot shows clear range distribution with category color coding.	High	Sprint-1
Fleet Operator	Charging Optimization	USN-3	As a fleet manager, I want to benchmark DC fast-charging times across battery types so that I minimize vehicle downtime.	Charging time box/bar chart renders clear comparisons under 30 minutes.	High	Sprint-2
Fleet Operator	Cost Analysis	USN-4	As a fleet operator, I want to evaluate 3-year resale values and insurance costs so that I can calculate total cost of ownership.	Resale value vs price regression analysis is displayed with trendlines.	High	Sprint-2
Automotive OEM Analyst	Performance Benchmarking	USN-5	As an automotive strategist, I want to analyze motor power vs. energy efficiency (Wh/km) to optimize powertrain R&D.	Dual-axis visualizations show efficiency curves across drivetrains (AWD/RWD/FWD).	Medium	Sprint-3
Environmental Policy Maker	Sustainability Impact	USN-6	As a sustainability auditor, I want to quantify annual CO2 emissions saved by region so that I can measure green impact.	Geographic/regional visual shows total metric tons of CO2 saved.	Medium	Sprint-3
Web User / Stakeholder	Web Accessibility	USN-7	As a remote user, I want to access the interactive dashboard via a standard web browser without installing Tableau.	Flask web application renders embedded dashboard smoothly via localhost/web URL.	High	Sprint-4
Project Administrator	Story Narrative	USN-8	As an executive, I want a guided storyboard highlighting key market findings so that I can make quick strategic decisions.	Tableau Story tab provides sequential narrative slides with clear	Medium	Sprint-4
