Customer Problem Statement Template:

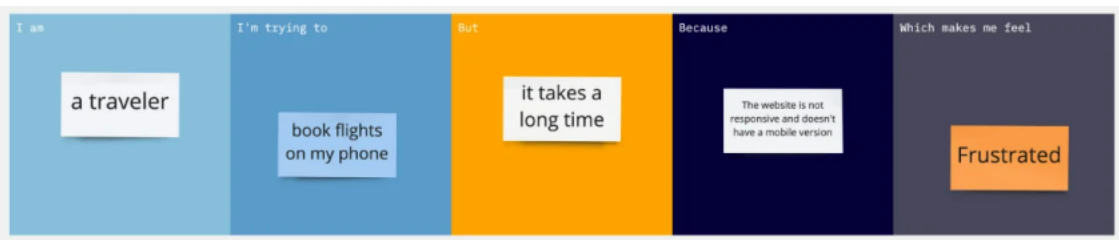

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A prospective	Evaluate real-world driving	It is difficult to	Manufacturer specifications	Overwhelmed, uncertain, and hesitant to transition

	EV buyer / fleet manager looking for a reliable, cost-effective vehicle for daily commute and long-range transport.	range, charging speed, and total cost of ownership (purchase price, yearly insurance, and 3-year resale value) across vehicle categories.	compare multiple brands, battery types (LFP, NMC, Solid-State), and degradation rates in one place.	are fragmented, lack standardized comparisons, and don't clearly show trade-offs between battery capacity, charging time, and resale value.	from conventional fuel vehicles to electric mobility.
PS-2	An automotive product strategist / EV manufacturer analyst analyzing global adoption and market competitiveness.	Identify market segment gaps, assess regional annual sales trends, benchmark energy efficiency (Wh/km), and optimize battery chemistry choices.	Complex multidimensional data makes it challenging to pinpoint which technical configurations deliver maximum customer satisfaction and carbon savings.	Traditional static spreadsheets cannot dynamically filter cross-functional metrics like motor power, safety ratings, drivetrain, and CO2 emissions saved.	Frustrated by delayed strategic decisions and the risk of misallocating R&D investments into uncompetitive EV segments.
