Ideation Phase
Empathize & Discover

Date	28 October 2026
Team ID	SKILLWALLET-EV-01
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	4 Marks

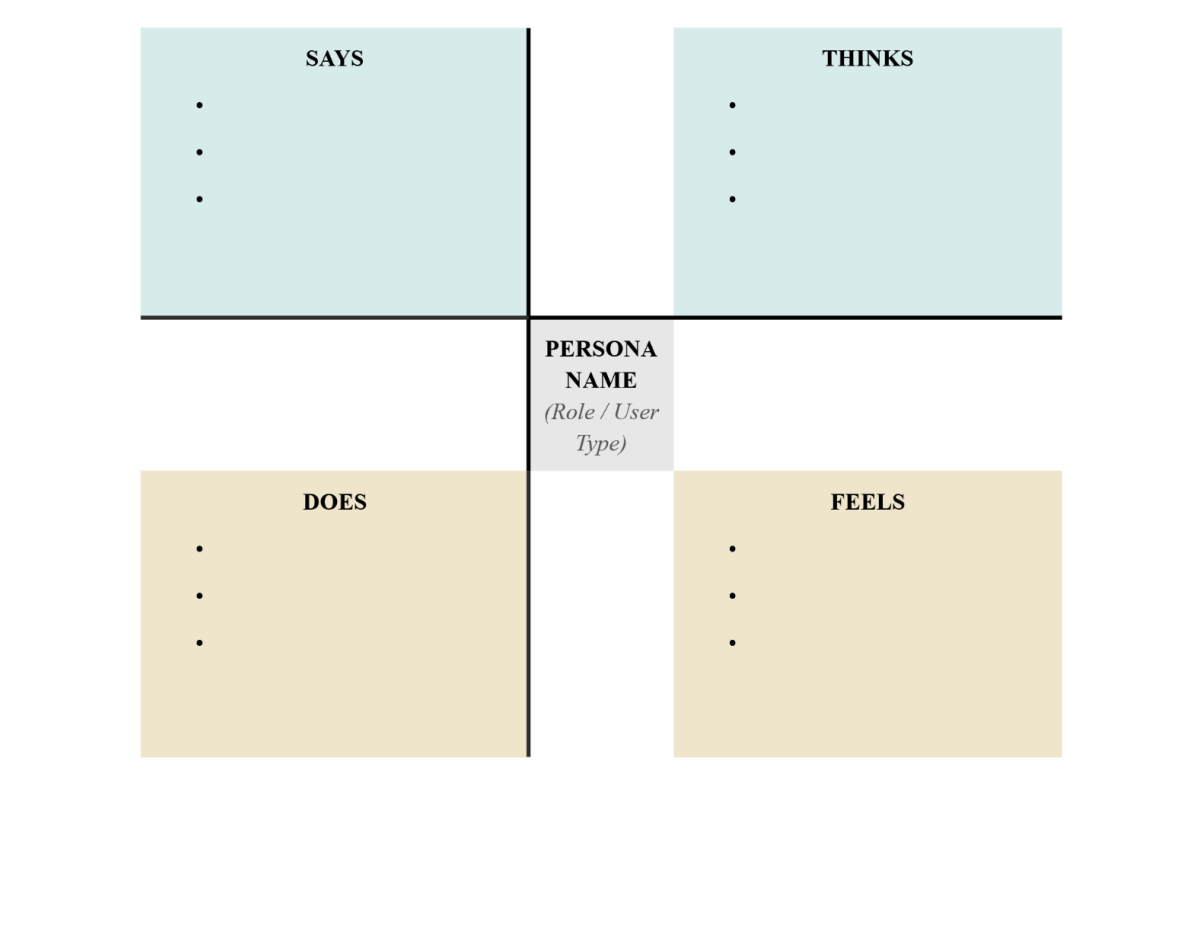

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map Quadrant	User Perspectives & Observations (Prospective EV Buyer / Fleet Manager)
PERSONA PROFILE	Name: Alex / Devansh | Role: Modern Fleet Manager & Daily Commuter Goals: Reliable zero-emission transport, low total cost of ownership, high range confidence.
SAYS	• 'Will this EV battery last more than 5 years without severe degradation?' • 'How long will I actually wait at a public DC fast charger?' • 'Is the premium purchase price justified by future resale value and fuel savings?'
THINKS	• 'I want to go green, but I cannot risk getting stranded on highways.' • 'Resale value might drop if solid-state batteries make current packs obsolete.' • 'I need a clear, objective comparison between LFP, NMC, and NCA chemistries.'
DOES	• Compares multiple manufacturer spec sheets and battery warranties. • Analyzes range-to-price ratios across Sedans, SUVs, and City cars. • Looks for independent dashboard tools and real-world performance metrics.
FEELS	• Confused by technical jargon (Wh/km, kW charging curves, degradation rates). • Hesitant about high initial insurance and acquisition costs. • Relieved when interactive dashboards clearly visualize trade-offs and savings.
PAINS & GAINS	Pains: Range anxiety, long charging downtime, unstandardized pricing. Gains: High torque/acceleration, zero emissions (CO_2 savings), and predictable operational costs.
