Project Development Phase
Performance Test

Date	28 October 2026
Team ID	SKILLWALLET-EV-01
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Total Records Loaded: 100,000 rows across 37 attributes from ev_market_test.csv. Tableau Data Extract (.hyper) utilized for sub-second rendering latency.
2.	Data Preprocessing	Standardized numerical & categorical types, validated zero missing values in primary metrics (battery_capacity_kwh, range_km, price_usd), and verified range consistency.
3.	Utilization of Filters	Interactive global filters implemented: Market Region, Vehicle Category, Manufacturer, Drivetrain (AWD/RWD/FWD), and Model Year. Filter response time tested under 1.5 seconds across all sheets.
4.	Calculation fields Used	1. [Cost per Km Range] = SUM([price_usd]) / SUM([range_km]) 2. [Degradation Severity] = IF [battery_degradation_pct_5yr] > 20 THEN 'High' ELSE 'Normal' END 3. [Total CO2 Impact] = SUM([co2_saved_tons_per_year])
5.	Dashboard design	No of Visualizations / Graphs: 9 core interactive charts arranged in a structured 3x3 layout with responsive sizing and unified color palette.
6.	Story Design	No of Visualizations / Scenes: 4 comprehensive Story points covering Market Adoption, Technical Range & Charging, Economic Viability, and Sustainability Impact.
