Story

Date	28 October 2026
Team ID	SKILLWALLET-EV-01
Project Name	Electric Vehicle Market Performance & Insights
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Observations:

- Market Sales Leadership: SUVs and Sedans dominate total annual unit sales across North America, Europe, and Asia-Pacific, capturing over 58% of overall market share.
- Battery Chemistry & Range Correlation: Solid-State and NCA battery chemistries provide the highest driving range (>500 km), while LFP demonstrates superior degradation resistance over 5 years.
- Fast Charging Efficiency: Vehicles equipped with 800V architectures and high DC fast-charging capacity (>150 kW) achieve 10-80% charge times under 25 minutes.
- Resale Value & Economic Stability: Premium EV segments retain an average of 58.5% resale value after 3 years, significantly offsetting higher initial purchase prices.

Activity 2:

Publish Story on Tableau Public and Paste Public link below
